Terms—\$20 and under, cash; above that, fourteen months time, bankable paper, 10 per cent. interest, 10 per cent. off for cash.

—A very pleasant affair took place at Mr. Louis Jones's south of the Loup last Monday night, it being the occasion of his daughter Lettie's 16th birthday. The young people of the neighborhood, together with several teachers from the Institute were there, and all united in saying they had enjoyed themselves, and in wishing Miss Jones "many happy birthdays."

—There are excellent voices in the Andrews company, notably the basso of George Andrews, who gave us an encore "Heart Bow'd Down" with power, force and feeling. All the singing was good and the musical accompaniments by Miss Nettie Wilson at the piano and Frank Williams at the violin was an important feature of the entertainment. Everything connected with the Andrews rendition of the Mikado was as near perfection as that degree can be attained upon a small stage and without a chorus numerically strong.

—Aside from these features the Andrews company equals the best presentations of this opera upon metropolitan boards.—*Yankton Dakotian*.

—The first of the week, upon invitation of Mr. Peter Heimbach, the corner band and other from Columbus, besides about 100 friends and neighbors of Mr. H., visited this gentleman's premises on the Looking-glass 13 miles northwest of this city and the universal expression of the band boys is that they had a royal good time. Since taking possession of this place (formerly owned by W. E. Walton) Mr. Heimbach has brought about a wonderful change in the surroundings, and it is the general opinion of knowing ones in that vicinity that it will become famous as a resort and be visited by many people from near and far. Underneath the large, wide-spreading boughs of mammoth elm trees, Mr. H. has graded up the creek making a very fine croquet ground which can also be used for dancing purposes. Thirty-eight feet above the creek bed, built upon the huge limbs of the giant tree of all, is a platform supported by strong timbers large enough to accommodate quite a number of persons who might be inclined to the novelty of enjoying a dance "up a tree." This platform is easily reached by foot steps cut into the side hill. A spring of splendid water is close by which adds materially to the comfort of visitors. Mr. Nick Heimbach says that in a short time he will have the arrangements complete for boat riding on the pellucid waters of the Looking-glass.—The person who still doubts that Nebraska is not a fruit-growing state should visit this place and have such doubt removed. Here can be seen four acres bearing six and thirty young apple trees as one would wish to see, which are just beginning to furnish golden fruit. Plums, both wild and tame, grapes, several different varieties, raspberries, walnuts, and in fact almost all kinds of fruit, here abound in abundance. M. V. Mundy, Esq., of Genoa, was present and during the afternoon was called on by the assembly for remarks, and in his usual happy manner thanked the host and hostess, on behalf of guests, for the enjoyment of the day. The ladies of Mr. Heimbach's household deserve considerable credit for the faultless manner in which the meals were served, all the substantial and delicacies of the season being on the table, and presented at call by Miss Lena Heimbach and her friend Miss Lizzie Cook. Even such fastidious and hearty feeder as our jovial friend Emil Pohl, leader of the band, was completely satisfied, filed. When a modest companion, quietly asked a question, he snapped back at him, "My—Mike, don't talk to me, I want to eat." The only drawback to the enjoyment of the day was the disappointment of the Columbus folks in not witnessing a wedding that it was intimated was to take place, and for which Henry A. is mainly, if not wholly, responsible. Our reporter gives us the program of the concert on the return trip led by Walter Phillips and John Seipp, and the record that G. A. Schroeder made as a manipulator of the ribbons of the four-in-hand, but lack of space prevents publishing.

Thirty-eight feet above the creek bed, built upon the huge limbs of the giant tree of all, is a platform supported by strong timbers large enough to accommodate quite a number of persons who might be inclined to the novelty of enjoying a dance "up a tree." This platform is easily reached by foot steps cut into the side hill. A spring of splendid water is close by which adds materially to the comfort of visitors. Mr. Nick Heimbach says that in a short time he will have the arrangements complete for boat riding on the pellucid waters of the Looking-glass.—The person who still doubts that Nebraska is not a fruit-growing state should visit this place and have such doubt removed. Here can be seen four acres bearing six and thirty young apple trees as one would wish to see, which are just beginning to furnish golden fruit. Plums, both wild and tame, grapes, several different varieties, raspberries, walnuts, and in fact almost all kinds of fruit, here abound in abundance. M. V. Mundy, Esq., of Genoa, was present and during the afternoon was called on by the assembly for remarks, and in his usual happy manner thanked the host and hostess, on behalf of guests, for the enjoyment of the day. The ladies of Mr. Heimbach's household deserve considerable credit for the faultless manner in which the meals were served, all the substantial and delicacies of the season being on the table, and presented at call by Miss Lena Heimbach and her friend Miss Lizzie Cook. Even such fastidious and hearty feeder as our jovial friend Emil Pohl, leader of the band, was completely satisfied, filed. When a modest companion, quietly asked a question, he snapped back at him, "My—Mike, don't talk to me, I want to eat." The only drawback to the enjoyment of the day was the disappointment of the Columbus folks in not witnessing a wedding that it was intimated was to take place, and for which Henry A. is mainly, if not wholly, responsible. Our reporter gives us the program of the concert on the return trip led by Walter Phillips and John Seipp, and the record that G. A. Schroeder made as a manipulator of the ribbons of the four-in-hand, but lack of space prevents publishing.
